

Bobcat®

RENTAL **PROFILE**

FAST, SIMPLE AND CONVENIENT, BOBCAT RENTAL MACHINES ARE BEING DELIVERED TO SITE READY TO WORK IMMEDIATELY.

One Tough Animal

Bobcat Rental has a proud 15-year-long legacy of servicing the unique requirements and applications of a large and diverse customer base in the most efficient manner possible. Firmly entrenched throughout Bobcat Equipment South Africa, this ethos of service, dependability and innovation transcends equipment rental. It has supported the rapid growth of this Division over many years.

Our machines are ready for any job, outperforming in diverse and demanding applications in the construction, mining, agriculture, as well as transport logistics industries

Bobcat Rental procures all its machines from Bobcat Equipment South Africa, renowned for its best-in-class rugged compact equipment. They include state-of-the-art B730 tractor-loader backhoes (TLBs), telehandlers and Mini-excavators. This is in addition to the wide range of skidsteer loaders that make up our skid-steer loader rental fleet, which is the largest in South Africa.

Our skid-steer loaders, one of the most popular items of equipment available from Bobcat Rental, can be equipped with a comprehensive range of interchangeable attachments. Among others, they include state-of-the-art Bobcat road sweepers, trenchers, hydraulic breakers and tar planers, transforming the world's best skid-steer loader into a highly versatile and efficient workhorse.

Bobcat Rental's TLB is also another popular and adaptable machine. It is being used for digging, trenching, breaking, or general materials-handling.

All Bobcat Rental machines are also offered with Services Sector Education and Training Authority (SETA)-certified operators. Skilled and experienced in the operation of our machines, they are maximising productivity and safety on our clients' worksites.

All our machines are regularly serviced and repaired at Bobcat Rental's various branches located nationwide to ensure uptime on even the most remote project site. Older equipment is retired in good working order and replaced, providing business continuity for clients on their various projects.

The many rental machines working in the field are supported onsite by a large spare parts and wear item inventory, as well as a team of skilled and experienced Bobcat Equipment technicians.

On standby 24 hours seven days a week to keep our machines operating at optimal levels, our technicians also support Bobcat Rental's 24-hour exchange policy. It guarantees clients a service exchange unit at no additional cost should they be unable to repair a rental unit on site.

Other innovative offerings, such as discounted rates for rental combos, which include a machine and an attachment, provide further appeal to our rental solution. This is especially true in tough economic conditions where a large capital outlay adds to the challenge of maintaining a healthy bottom line. With our rental packages, there are also no service, maintenance or repair costs for the end user.

Speak to us about our equipment rental solutions, which include daily, weekly, monthly and evergreen contracts that cater for the full market spectrum.
